- A level: Mathematics B Design & Technology B
 - Geography C
- GCSE: 5 A's | 4 B's including B in English, A in Math

EMPLOYMENT HISTORY

Waiter

McClarnon's Ramble Inn

📅 07/2020 - Ongoing 📍 Antrim, Northern Ireland

A local family-orientated restaurant in Ballymena.

- Driving force behind generating new sales leads and contacts, coordinating with team of 8 members to provide customer satisfaction.
- Establish resilience under pressure to maintain high quality of service to customers.
- Conduct initiative completing other tasks to contribute regardless if it is part of required duty.

INTERESTS & ACHIEVEMENTS

🎸 Self-taught Guitarist

❤️ Raised over £2000 for 'Friends for Romania' Charity

💻 Stay up to date with PC technology and CPU and GPU Market.

PROGRAMMING

Java Python JavaScript

HTML & CSS SQL C++

Technologies

MySQL MongoDB Git

Algorithm Design & Analysis

Data Structures Express.js React.js

Node.js

STRENGTHS

🗨 Communication

I work as a waiter in a local restaurant. Maintain clear oral & written communication.

👥 Dedicated team player

I strongly believe that there is nothing more powerful than a group of hard working passionate people with a common goal.

✓ Reliable and Consistent

I am passionate about working in a group setting, always on time, meeting deadlines and following tasks through.

📈 Constant learner

I love to increase, advance and strengthen my knowledge. Maintaining pace by actively learning new skills and sharing knowledge.

LANGUAGES

English Native

Tagalog (Filipino) Upper Intermediate

PROGRAMMING PROJECTS

DeveloperLink

📅 08/2020 - 09/2020

🔗 <https://github.com/Jaspier/DeveloperLink.git>

DeveloperLink is a full-stack web application allowing developers to 'link' with each other. A responsive web application. Users can sign in to an existing account or register and create a profile. Users can also write posts, other developers can 'like' and 'comment'. Deployed with Heroku.

- Used technologies: MongoDB, Express.js, React.js, Node.js, HTML5, CSS, JS.

A* Path Finder Visualiser

📅 06/2020 - 07/2020

🔗 <https://github.com/Jaspier/astar-Path-Finding-Visualiser.git>

Using pygame:

. I programmed a UI showing all possible open and closed nodes as it recursively tries to find shortest path from start node to end node. Uses a Priority Queue to hold track of list of open nodes.

- Used technologies: Python, Pygame.

Sudoku Solver

📅 04/2019

🔗 <https://github.com/Jaspier/JavaScript-Sudoku-Solver.git>

Developed with JavaScript, I used a p5.js library to construct a UI to visually see a Sudoku board being solved using backtracking algorithm to find a solution.

- Used technologies: JavaScript, p5.js.

Sorting Algorithm Visualiser

📅 Date period 📍 Location

<https://github.com/Jaspier/Sorting-Algorithm-Visualiser.git>

- Developed using Java, I used Gradle to create a fast and efficient visualising tool for seeing how different sorting algorithms operate in action.
- Used technologies: Java, Gradle.
